He has published over 110 articles in leading refereed academic journals in finance, management, and law and economics, such as the Journal of Financial Economics, Review of Financial Studies, Journal of International Business Studies and the Journal of Empirical Legal Studies.

**Topic:**  «Do International Investors Enhance Private Firm Value?»

**Abstract:**

We examine the impact of international venture capital investors on private firm success spanning 69 countries over the years 1995-2010. The data examined indicate that, relative to deals in which the investor base is purely domestic, private firms that have an international venture capital syndicate have a higher probability of exiting via IPO and higher IPO proceeds, as well as higher total deal M&A values. These relationships, however, depend on the level of internationalization and hence imply a tradeoff between the strategic benefits associated with international investors and the costs associated with geographic, cultural and legal differences across countries.
